

## Going beyond the standard of care for your best possible health.

At the Center for Integrative Medicine, we go beyond the standard of care by integrating alternative, complementary and holistic medicine techniques into your treatment.

### A highly effective, individualized approach.

Everything we do is based on the unique factors involved in your health and life. You are unique, and we know from decades of experience that the most effective care—that which resolves problems—requires individualized treatment.

### Focused on treating cause, not symptoms.

Sounds simple enough: treat what’s wrong rather than its evidence. Mainstream medicine does this, but we’ve achieved better outcomes by integrating other methods known to work well. This applies to both diagnosis and treatment, which is why Dr. Kadile often orders more thorough, less common tests and integrates therapies not common in mainstream-medicine-only practices.

### Maximizing your safety and outcomes.

A harmonious integration of traditional and complementary medicine best serves patients’ needs. It also provides a safer solution than do dangerous medications, endless doctor visits and mounting sometimes massive medical bills. That’s why Dr. Kadile uses gentle, natural alternative treatments that are free of the side effects of prescription drugs.

These integrative methods also save you time and money compared to a solely mainstream approach. They allow us to empower you with the high-energy, healthy and pain-free lifestyle you deserve!

### Solution-Oriented Care for Many Conditions

- Obesity • Diabetes • Cardiovascular disease
- High blood pressure • High cholesterol
- Hormone (thyroid & adrenal) dysfunction
- Low testosterone • Menopause • Chronic fatigue
- Fibromyalgia • Infertility
- Muscle & joint pain • Depression
